Since its founding, in 1987, Jimpisoft Software house has developed and distributed user-friendly software. With more than 25 years working with rent-a-car businesses, we can assure you that we have an extensive experience in this field which make our software the key for your business success. Along the way, we have worked closely with our customers, in constant dialogue, adapting our system, to make Rentway® the solution to compete in the new millennium. However, we know that a software is a never ending creative process and we thrive on improving it every day, with the help of our partners. Adjustable, safe and dynamic, this software is the global solution of choice for car renting companies of any size. Our know-how grants the best tailored solutions. Most of our work is done with Microsoft® tools and Microsoft® SQL Server. Today our system is implemented in more than 70 countries with over 250 Partners. We can present you with a free, no obligation tailored proposal, to pave your company's path to success.
